## COLOR APPROVAL FORM

Manuscript ID#: GENOME/YEAR/ \_\_\_\_\_

First Author Name: \_\_\_\_\_

Last Author Name: \_\_\_\_\_

Below is the cost of publishing your figures in color. The pricing scale is as follows: The first 4 color figures are billed at \$700 each, Figures 5–8 at \$300 each, and Figures 9 or more at \$150 each. Please enter the figure numbers for all color figures submitted with your accepted manuscript, calculate the total charges, and sign this form. Signature indicates acceptance of the cost of color reproduction and you will receive color proofs with your galleys. Please return within 48 hours, as we cannot proceed with publication of your article until we receive this form. Please note that any figures submitted in color but not noted on the form will automatically be converted to black and white. Also, please note that if a replacement figure is supplied at the page proof stage, the cost to insert a revised figure is \$150.

FIG. #	COST	NOTE: For example, if all panels to one figure are submitted on one "sheet" of paper, up to 8 1/2" x 11", then there is only one figure fee for this figure. However, if any panel(s) of one figure is submitted on a separate sheet, then each of these panels/sheets constitutes a separate "figure" charge (e.g., Figure 1, panels A and B, would be two figure charges if A and B are submitted on separate sheets; scans are handled one sheet, or "Figure sheet," at a time). Conversely, if Figures 4 and 5 are supplied on one sheet, these are billed as two separate figures because each figure requires its own scan/art proof, as charged by the printer.
